

BLUEBERRY MIMOSA

Blue Mimosa is a slightly sativa dominant hybrid strain (60% sativa/40% indica) created through crossing the potent Blue Cookies X Mimosa strains. If you're wondering what this bud tastes like, don't look too much further than its name – it'll tell you everything that you need to know. With each delicious little toke, you'll find flavors of sweet fruity blueberries, sugary citrus and a hint of tropical fruits dancing across your tongue.

Description

 **Sativa Dominant Hybrid - 60% Sativa / 40% Indica**

THC: 27% - 29%

Blue Mimosa is a slightly sativa dominant hybrid strain (60% sativa/40% indica) created through crossing the potent Blue Cookies X Mimosa strains. If you're wondering what this bud tastes like, don't look too much further than its name – it'll tell you everything that you need to know. With each delicious little toke, you'll find flavors of sweet fruity blueberries, sugary citrus and a hint of tropical fruits dancing across your tongue. The aroma is very much the same, almost like you're enjoying a blueberry mimosa while taking a walk on the beach. The Blue Mimosa high will wash over you as soon as you exhale, infusing both mind and body with a burst of happy energy. You'll feel motivated and euphoric with a creative inclination, ready to jump up and get to work on anything on your to-do list. A light sense of physical calm will accompany this happy boost, releasing your body from aches and pains without affecting your energy level. In combination with its super high

27-29% average THC level, these effects make Blue Mimosa a great option for treating chronic stress, chronic pain, depression, chronic fatigue and headaches or migraines. Blue Mimosa buds have oversized and fluffy forest green nugs with deep blue undertones, thin orange hairs and milky amber crystal trichomes.
