

CAKEMERA #12

Love the Chimera and Cobra Chi but want something a little different? Well, you found it! This variety gets chucky swollen colas and stacks all the way down to the bottom with a wonderful cakey gassy nose. The nose comes out with a blackberry kush front end and cakey notes on the backend. Like the other two Chimera varieties, very minimal foliage making this strain very ideal for production and saving in labor costs.
