Description

This sativa-leaning powerhouse delivers a rush of sour citrus, diesel funk, and rainbow candy notes that'll have your grow op smelling like a wild carnival treat.

Sour Zkittlez is a slightly sativa dominant hybrid strain (70% sativa/30% indica) created through crossing the classic Zkittlez X Sour Diesel strains. Named for its celebrity parentage and crazy flavor, Sour Zkittlez is the perfect choice for any classic sativa lover.

Like its name suggests, Sour Zkittlez has a sweet and sour tropical candy flavor with a lightly spicy grapefruit exhale. The aroma is very similar, with a peppery grapefruit overtone accented by sweet tropical fruits and sharply sour citrusy candy.

The Sour Zkittlez high is just as vibrant, with energizing and bright effects that will activate your mind and get you running instantly. The high starts almost immediately, filling you with a lifted motivation that has you jumping on anything and everything on your to-do list. This is accompanied by a punch of sociability and a sharp pang of hunger that has you reaching for anything and everything in sight to snack on while you chat easily with those around you.

With these effects and its high 24-27% average THC level, Sour Zkittlez is often chosen to treat conditions such as chronic fatigue, depression, mood swings, chronic stress and appetite loss or nausea. This bud has fluffy grape-shaped forest green nugs with purple leaves, thin light orange hairs and a coating of tiny milky white crystal trichomes.

Perfect for creative cultivators in legal markets like California, Colorado, and New York chasing uplifting vibes and massive hauls, **SOUR ZKITTLEZ** is your ticket to buds that pop with personality and potency.

Hand-propagated clones ready to root and rock your garden—let's turn up the flavor dial! *21+ only, for legal cultivation—check local laws and spark this sour sensation!*

Strain Breakdown

Data Point	Details
THC % Avg	22-26% – A potent punch for that elevated edge!
Terpene % Avg	2-3% – Loaded with limonene (zesty citrus), caryophyllene (spicy depth), and humulene (earthy hum) for a terpy, aromatic blast.
Flower Time	8-9 weeks – Quick to bloom and ready to dazzle.
CBD %	<0.5% – Low and focused on the fun side of the spectrum.
Yield	Indoor: 500-700g/m² | Outdoor: 600-800g/plant – Stack those shelves with sour swagger!
