Description

Sherbert, also known as "Sherbet", "Sherbert OG", "Sunset Sherbet", and "Sunset Sherbert" is an indica-dominant hybrid marijuana strain

HYBRID CLONES: SUNSET SHERBERT

made by crossing Girl Scout Cookies with Pink Panties. This strain exhibits powerful, full-body effects that are elevated by a jolt of cerebral energy and carefree state of mind. Sherbet boasts a THC level of 18% and may be overwhelming to novice cannabis consumers. The high potency of Sherbert makes it an ideal choice for medical marijuana patients seeking relief from symptoms associated with stress, tension, and mood disorders. This strain features a sweet, dessert-like flavor profile with notes of skunky citrus, sweet berry, and candy. The average price per gram of Sherbert is \$20, but may vary based on your location. According to growers, Sherbert flowers into oblong fluffy nugs with rich trichome coverage and dark amber hairs throughout light and dark green foliage. This strain was originally bred by Mr. Sherbinski, who bred Sherbert intentionally to inherit the genetic lineage of its parent strain Girl Scout Cookies.
